

21ST CENTURY PROTECTION

Protecting capital investment and business process are critical to being profitable in today's competitive market. So why use thirty year old legacy technology like, MOV's, SAD's and Selenium Cells that attempt to divert the issue across the electrical distribution. The harmful energy should be removed not diverted!

ENVIRONMENTAL POTENTIALS HAS THE SOLUTION!

EP's patented wave tracking technology absorbs and dissipates Transient voltage spikes ,flash over lighting strikes and removes it from electrical distribution without discharging energy to ground. Protecting your sensitive electronic loads and isolating your building from external disturbances.
