FRAMELESS SHOWER ENCLOSURE

THREE SIMPLE STEPS TO A NEW FRAMELESS SHOWER

Global Sales makes it easy to get a Frameless Shower in Bermuda or the Caribbean. Simply select your preferred styles, measure and contact us for a no-obligation quote.

STEP 1: CHOOSE YOUR STYLE

Review the options to determine which shower style works best for your bathroom.

STEP 2: SELECT GLASS AND HARDWARE

Select the best options for glass thickness and hardware (hinges, clips and door handle) that matches your design style.

STEP 3: MEASURE SHOWER SPACE

Our design team works with you to measure the space and provide a quote. They can also help with any additional items for your bathroom project.

1

CHOOSE YOUR STYLE

SQUARE CORNER SHOWER

This is a great choice for a small space since it fits tight into the corner of your room. Corner showers maximize square footage while the glass gives the illusion of a larger area.

**RECTANGULAR SHOWER**

The rectangular style is ideal for larger spaces. There are many placement options, including: against a flat wall, in a corner, set back into the wall or free-standing.

**PANEL OR SCREEN**

For a minimalist look, consider a simple panel with an open entryway. This style works best with the shower head directly overhead. One large glass panel keeps the water in while providing an open and airy feeling for your bathroom.

CHOOSE YOUR STYLE

1

NEO-ANGLE SHOWER

This innovative style is a great option for a small bathroom. The shower door is centered between two or three panels angled at about 135 degrees. The layout takes up less space with the feeling of a larger shower. The angles add style and make the shower a focal point while maximizing space.

Each glass panel is custom made for a perfect fit in any bathroom.

SLIDING SHOWER DOORS

Sliding frameless doors have a single rail along the top that both of the doors hang on. This rail allows the doors to slide past each other for both left and right-side openings.

2

SELECT GLASS & HARDWARE

Glass Options

CLEAR OR FROSTED GLASS

Choose your preference of either see-through clear glass or frosted glass for added privacy.

3/8-INCH OR 1/2-INCH HEAVY SHOWER GLASS

Three-eighth inch thick, tempered glass is the smaller thickness for frameless showers to maintain a solid and quality construction. Less glass also means less cost for a more budget-friendly option. Select the larger half-inch thick glass if you would like greater structural integrity and durability. This is the same kind of glass typically used for storefronts so it will look stunning in your bathroom.

Hardware Options

Select the hardware finish for shower hinges, clips and door handles to match your design style.

POLISHED CHROME

BRUSHED NICKEL

POLISHED BRASS

MATTE BLACK

MEASURE YOUR SPACE

3

SHOWER WIDTH

Measure the shower width from one side of the wall to the other. If you have a curb, always measure the shower width in the curb's center since the glass will sit in the middle of the curb. If you are on the floor, measure on the exact line you need the glass to sit on.

SHOWER HEIGHT

Using your tape measure, note the distance from the base of your shower to the top. If your shower door will rest on a threshold or curb, have your measurement begin at the top of the curb. If you would like your glass to be shorter than your shower's overall height, only measure up to where the glass or door will end. For your reference, standard shower height is 78 inches.

MEASURING TIPS

Finalize the walls before measuring: If you are using tile or a shower panels, install the walls first. Always measure from the finished walls.

Check that your walls are level and plumb: Use a level tool to check that horizontal surfaces are level and your vertical walls are plumb.

Always measure twice: Take each measurement twice and round to the nearest 1/16" for accuracy.

NOT SURE? WE'RE HERE TO HELP

Global Sales has been working with customers in Bermuda and the Caribbean for 40 years and we know that measuring can be challenging. We are always available for a phone call or a live chat via Skype or Zoom to help you with the measuring process.

THE GLOBAL SALES DIFFERENCE

FREE DESIGN SERVICE

We offer a free design service to customers in Bermuda and the Caribbean. There are no additional costs for design renderings, consultations, or quoting different product options.

Global Sales even provides two rounds of design revisions for free. Any additional revisions are \$75 each.

SMART SHIPPING

We take every precaution when shipping to make sure your shower arrives safely.

We measure to ensure the sizes are correct and double check that all the hardware is included. We also custom build a crate with padding around the glass panels. Then we strap the crate to the pallet. This keeps the glass safe while also maximizing space in the shipping container.

TOP CABINET LINES

Global Sales partners with industry-leading vanity manufacturers to provide you with the best options for your bathroom project and budget.

And, we only sell vanity cabinets made of materials that will hold up in the island climates of Bermuda and the Caribbean. We do not offer any inferior materials or flimsy construction cabinets.

INDUSTRY-LEADING PRODUCTS

Global Sales has been in business for 40 years and has relationships with the top manufacturers. That's why we can source everything you need for your bathroom project from showers and vanities to hardware, tile, plumbing fixtures, lighting, windows, doors and more.

WE SAVE YOU TIME AND MONEY

We consolidate all products from each manufacturer so your entire project arrives together. And, we pack the shipping containers at our own warehouse to provide exceptional shipping value.

Global Sales knows the process for clearing customs in each country so your entire shipment arrives on-time with the proper paperwork.

WARRANTY PROGRAM

Many manufacturers will only honor warranties within the United States. Once the products are shipped outside the US, the warranty is void. Global Sales solves this problem by extending the warranties to our customers in Bermuda and the Caribbean at no additional cost.

EVERYTHING FOR YOUR BATHROOM

Our Bathroom Experts Can Help with Your Entire Project!
